

LUCAE LAB 2026

CAMPOSAMPIERO & PADUA, ITALY | 15-18 OCTOBER 2026

ABOUT THE LUCAE LAB

The Lucae Lab is the main annual gathering of Societas Lucae. The program combines conferences and discussion groups with spiritual, cultural and fun time spent together.

If you don't know well about who we are and you don't know any other doctor or student going, the event is also especially designed for you!

LOCATION & ACCOMODATION

Oasi Sant'Antonio
Via Sant'Antonio 2
Camposampiero, Italy

PARTICIPATION FEE

Thanks to generous donors, the participation fee for the whole event can be kept low. It is possible to contribute by a more generous donation, for example 160 euros.

- EUR 80 students
- EUR 120 residents and physicians
- EUR 160 supporter rate

TRAVEL LOGISTICS

For those coming by car, parking spots are available.

For those coming by train, our venue is 5 minutes away from Camposampiero station.

For those coming by plane, the four nearest airports are Venice, Treviso, Bologna, Verona. There are direct train connections from Treviso & Padova to Camposampiero, and connections via Padova from Venice (Mestre or Centrale), Verona and Bologna.

PROGRAM

Thursday: arrivals from 14:00 on. Activities.

Friday: General Assembly. Conferences and discussion groups. Adoration evening.

Saturday: visit of Padua with private visit of the basilica of Santa Giustina and of the tomb of St Luke, patron of Doctors.

Sunday: Holy Mass. lunch.

DATES AND ARRIVALS

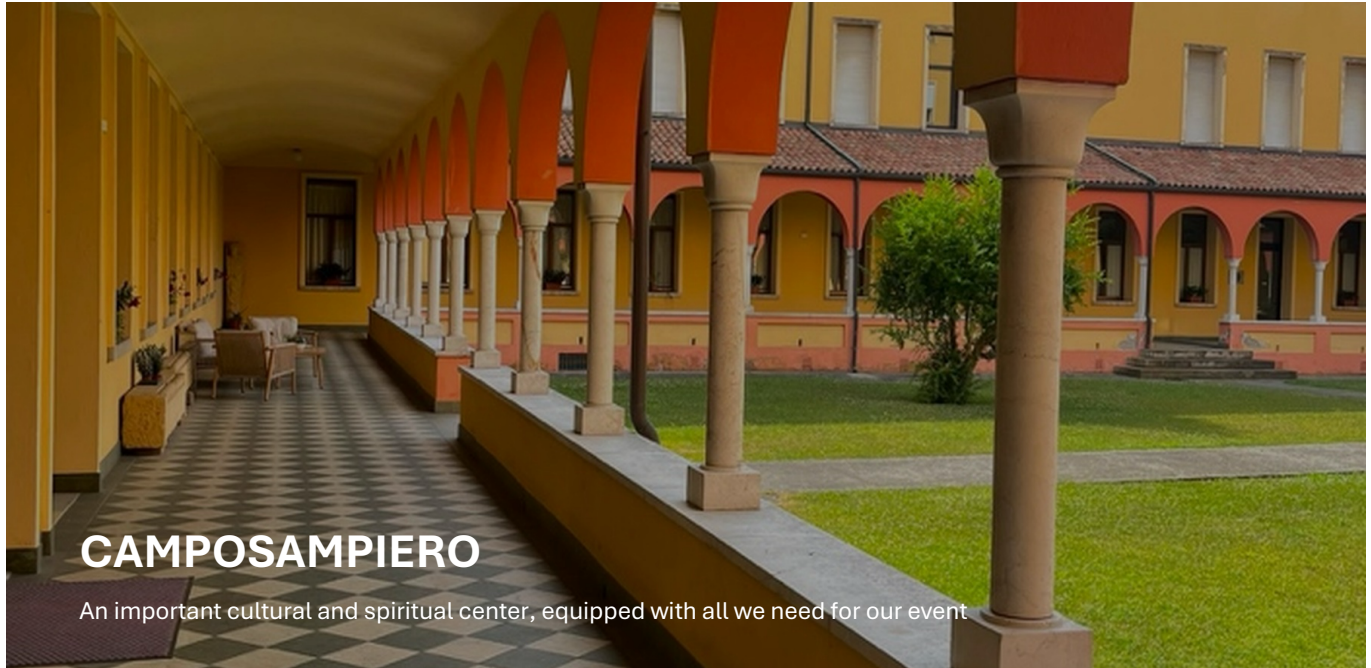

Arrivals are possible from Thursday afternoon onwards. Participants may also arrive later, up to Saturday morning. The program ends after lunch on Sunday.

REGISTRATION

You can register until September 20th using following link: <https://forms.gle/pyGJYUDeWnQpizVD6>

Location and Guests

CAMPOSAMPIERO

An important cultural and spiritual center, equipped with all we need for our event

Santuario della visione, Camposampiero: this sanctuary contains the cell where Saint Anthony lived for a short period at the end of his life. This is also where he received the grace of seeing and embracing the Child Jesus. This episode inspired the well-known iconography associated with the saint. The sanctuary also preserves a wooden panel where the saint rested.

Santuario del noce, Camposampiero: built on the site of a walnut tree that Saint Anthony used as a hermitage for prayer and contemplation. 16th-century frescoes inside.

Dr Dermot Kearney, MD MRCPI

Consultant Cardiologist
Former President of CMA UK
Advocate for Abortion Pill Reversal

Dr Jana Highholder

German medical Doctor
Christian speaker, author and influencer
Research on the role of spirituality in coping with illness

Basilica di Sant'Antonio: recognized as an international sanctuary, it is one of the most visited religious places in the Christian world. It houses the tomb and relics of Saint Anthony as well as important artistic masterpieces spanning different periods, beginning from the Middle Ages.

Basilica di Santa Giustina: an ancient basilica that houses the tombs of Saint Luke the Evangelist, medical doctor and painter, after whom Societas Lucae is named and whose feast day will be on October 18th! We will have a private visit from the Abbot of the Basilica who will also present to us the scientific examinations and studies carried out on the remains of Saint Luke.

Cappella degli Scrovegni: a medieval chapel treasure of art and beauty and a UNESCO World Heritage Site, home to the famous cycle of frescoes painted between 1303 and 1305 by Giotto who is regarded as one of the most important painters in the history of art.
